however not before spending the night alone and seeing the effects of the vampire playing before his eyes, even exchanging words with this supernatural force as the widow possesses. Everything in everything there are some interesting themes here and I don't like the story, but there's not just much substance and very little to get excited about. The end lines are pretty cool though, because they indicate that the scientist was actually the author of this same story, injecting some meta reality into the story. So I'd say it's worth reading and it's quite short, but not one of the best vampire stories I've read. ... more Set 21, 2020 Liz rated was ok Also known as a case of alleged vampirism. First published in 1907 in Rome, this story involves science against superstition. There are incidents that could involve a dead husband, but there's not much to pay for this. In the first story, A Vampire, one can certainly tell the clash between scientific investigation and superstitious beliefs, and I was very surprised to see how close this story was to the typical Gothic stories written at the same time by foreign authors and I never imagined that Italian authors could do it. The second, A Fatal Influence (I can't find english translation), was more confusing than the first, and I still have no idea what and why exactly it happened. Overall this wasn't the biggest Gothic bed ever, but it was really nice to find that some Italian authors actually knew and created something like that. ... I didn't know that Capuana wrote these because of the tales A Vampire and A Fatal Influence. In both the pressing and sometimes ironic dialogues that this author knows how to denocilate with masterful and the rhythm makes the scene seem alive with actors facing each other. A happy discovery, a small book but a lot of fun. On November 16, 2011, Mcke assessed that it was ok as a cross-breed between H.P. Lovecraft and Bram Stoker, but with far less to history. It's typical and nothing worth reading. It would probably be very good if rewritten in more depth and size to the story. Ask Gaia, your personal assistant Note A vampiro (The Vampire) is a short story by vampire, writer of the Italian writer Luigi Capuana. He appeared on July 1, 1904 in Corriere della Sera. History shows the clash between superstition and science that occurs around a case of vampirism. Synopsis Lelio Giorgi desperately turns to a friend of his, the scientist Mongeri, in the face of the harassment suffered by his wife and son by an evil spirit. Lelio Giorgi tells his friend that in his youth he fell in love with Luisa, but when he returned from a trip to America he discovered that he had married another man, under pressure from his family. Despite her sadness, she ended up accepting the situation and went to Paris, where a few months later she received a letter from Louise in which she told her that she had just been widowed. Lelio and Luisa married shortly afterwards. When Louise became pregnant, strange events began to occur in the wedding house: beatings, sounds of footsteps and the feeling of the presence of an invisible being. When their son was born, the situation worsened further and the baby's cradle began to be shaken, at the same time that Louise began to be accused by the spirit of poisoning her. An exorcism was not of any choice, but aggravated the attacks of the spirit, which began to absorb the essence of the child in his cradle without the parents being able to do anything. With his dying son and desperate wife, Lelio turns to his friend without knowing what to do. Mongeri is skeptical of his friend's account, considering it the result of hallucination, or disturbance of his mind, but believes that superstition often carries the key to care and advises his friend that if they believe they are being molested by a vampire, the best thing he can do is incinerate the corpse of Luisa's first husband. The next day Lelio returns with Mongeri, frightened, claiming that the vampire knows his intentions and threatens them. Mongeri, who remains skeptical, agrees to accompany him to his home that night, where nothing happens in principle. Suddenly, the baby's cradle begins to move, and Luisa shows that she is possessed by another being, speaking in a serious and threatening voice. Gathering all his courage, Mongeri confronts the vampire, ordering him to leave. After the body has been cremated, the vampire's attacks are stopped. Shortly thereafter Mongeri, with his convictions touched, publishes an essay entitled An Alleged Case of Vampirism. Bibliography Ibarlucia Ricardo (ed.)
